What's VTM

VEHICLE & TRANSPORTATION
TECHNOLOGY INNOVATION MEETINGS

Piemonte, the centre of future road mobility

Road mobility is undergoing a transition driven by four major trends: **sustainability, connectivity, Artificial Intelligence and new mobility models**. Electric and hybrid vehicles will become in the next future the best selling products, connected to each other and to the infrastructure and able to move autonomously.

This will be a breakthrough in the transportation of people and goods, and will significantly change the way vehicles will be designed, developed, produced and used. **New mobility models and the related services** will be diffused, creating stimulating opportunities of new products and services.

Piemonte is a leading cluster in the global automotive sector, thanks to the presence of major international **OEMs** and other **stakeholders**, a **complete and competitive supply chain**, **R&D centres**, **universities and engineering services**.

Altogether they are active in the development of disruptive technologies to fulfil the needs of future road mobility, developing distinctive technologies and solutions in the fields of **electrification, connectivity, autonomous driving, sustainable and shared mobility, Big Data and software-designed vehicles**, projecting the whole territory towards new challenges and new consumer markets.

When dealing with mobility research and development, Torino offers exceptional possibilities: it **is in fact one of the first cities in Italy allowing the testing of connected and autonomous vehicles on its public roads** and in real traffic conditions.

VTM is THE mobility technology event that brings together the vehicle and transportation community: from vehicle makers and tier suppliers to mobility decision makers, disruptive technology entrepreneurs and solution providers.

This unmissable event features a full program of conference sessions that will bring together the vehicle and transportation community to explore the key challenges and opportunities of the future of mobility and new vehicle technologies.

2022 KEY FIGURES

- > 300 Companies
- > 15 Start-up
- > 1,600 Participants
- > 3,500 B2B Meetings
- > 23 Countries

Represented countries

Austria, Belgium, Canada, Czech Republic, France, Germany, Hungary, Ireland, Israel, Italy, Latvia, Poland, Portugal, Serbia, Spain, Sweden, Switzerland, Taiwan, The Netherlands, Turkey, Uganda, United Kingdom, United States.

INNOVATIVE B2B MEETINGS

WHO CAN ATTEND?

BUYERS

**YOU WANT TO MEET SUPPLIERS
AND MANUFACTURING PARTNERS!**

You're involved in: Supply chain | Procurement | Purchasing | Engineering | Fabrication | R&D, etc.

SUPPLIERS

**YOU WANT TO SELL YOUR
CAPABILITIES, PRODUCTS OR SERVICES!**

You're involved in: Sales | Marketing | Business development | Technical promotion, etc.

sessions

B2B
meetings

Networking
opportunities

Exhibition

Conferences

- Electric and Hybrid vehicles, batteries and electric components
- Hydrogen, new sustainable propulsion systems
- Sensing and control technologies for ADAS and autonomous driving
- Short-and long-range connectivity, smart infrastructures, cloud services
- Testing, validation and certification of vehicles and components
- Applications for Software-defined vehicles
- Micromobility and new mobility concepts
- Urban air mobility

EXHIBITION CENTER

The event will take place at LINGOTTO FIÈRE - Pavilion 1, Via Nizza 294, 10126 Torino - Italy
